

VIRTUAL EXAM STUDY SUPPORT APP REWISE STORYBOARD

Olivija Guzelyte

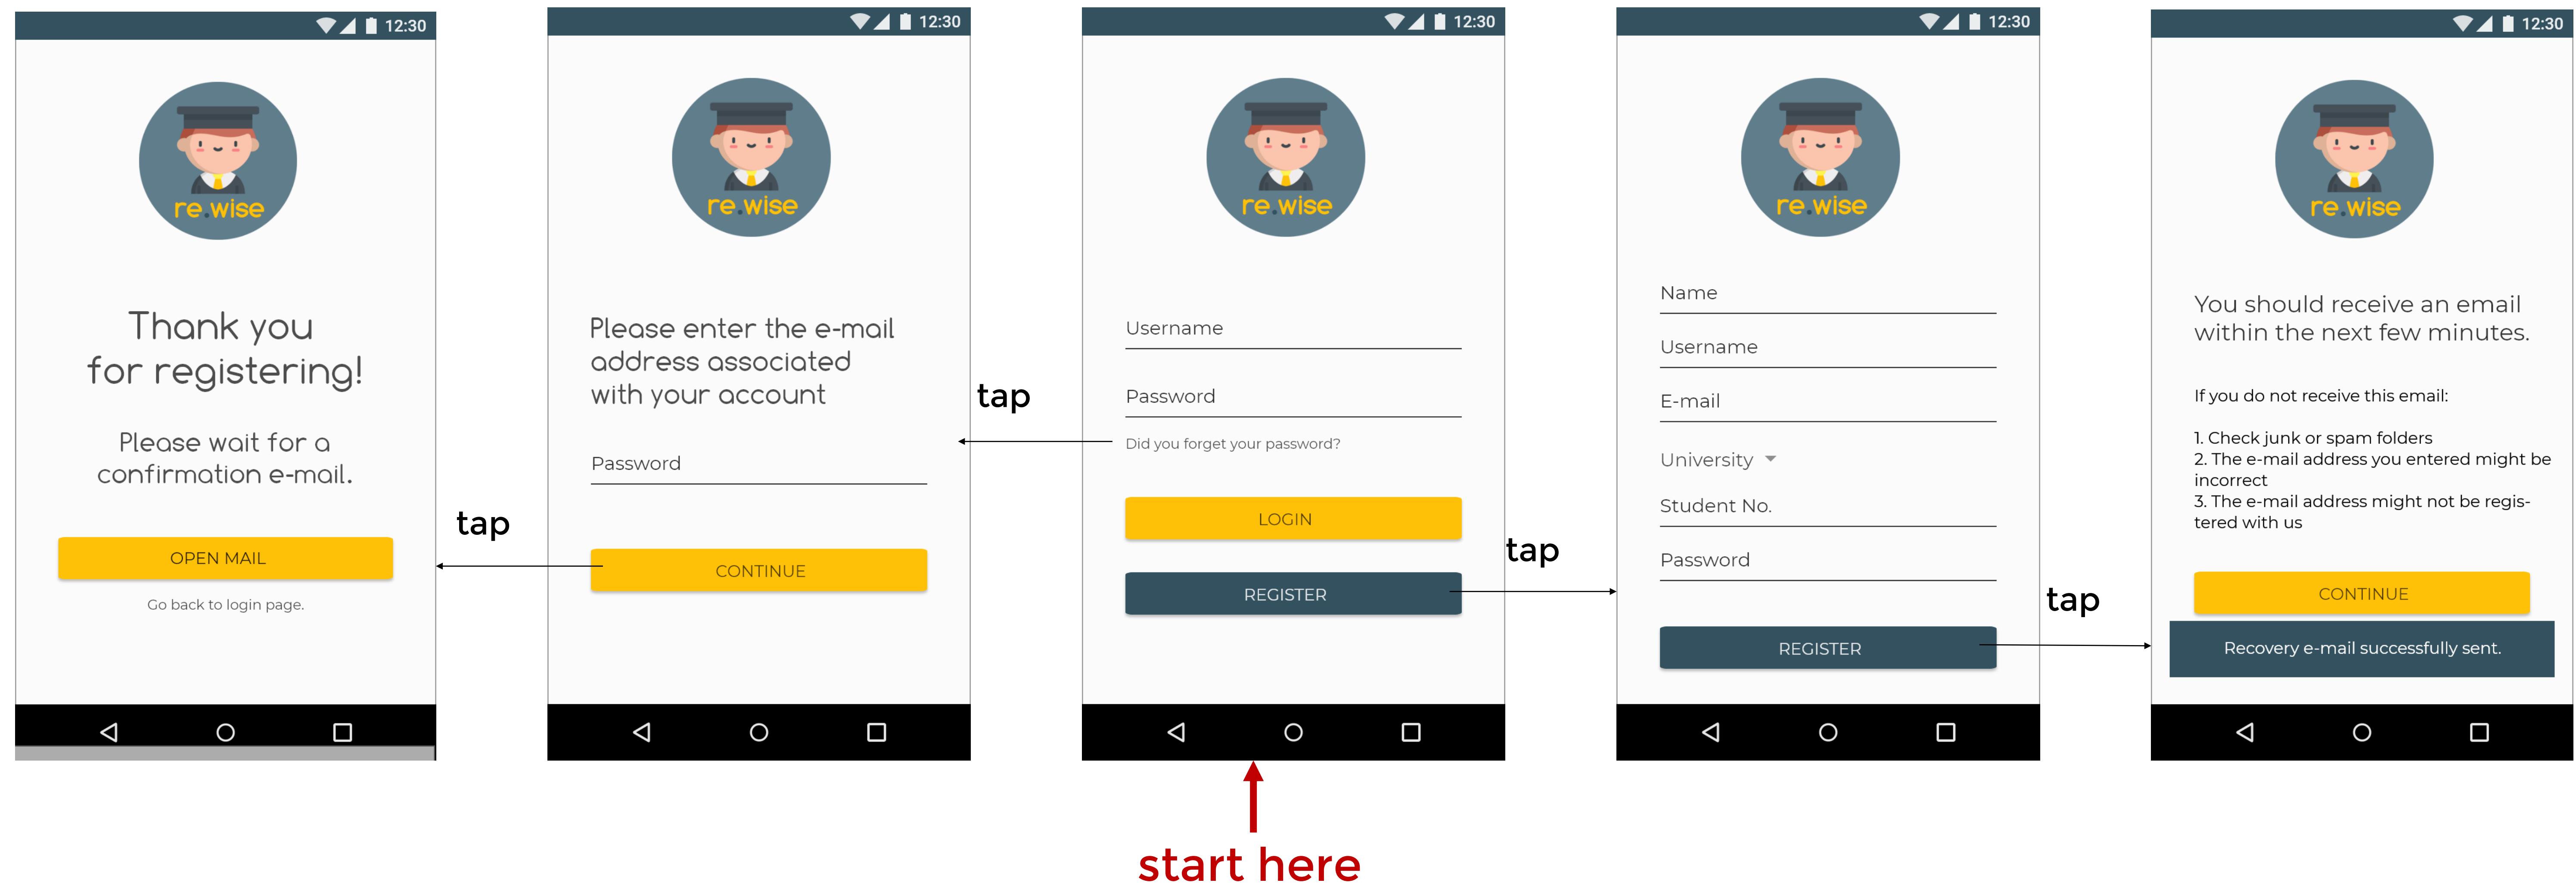

Student no. 160421859

System Overview

Login Component

This component is responsible for the login, registering functionality of the app.

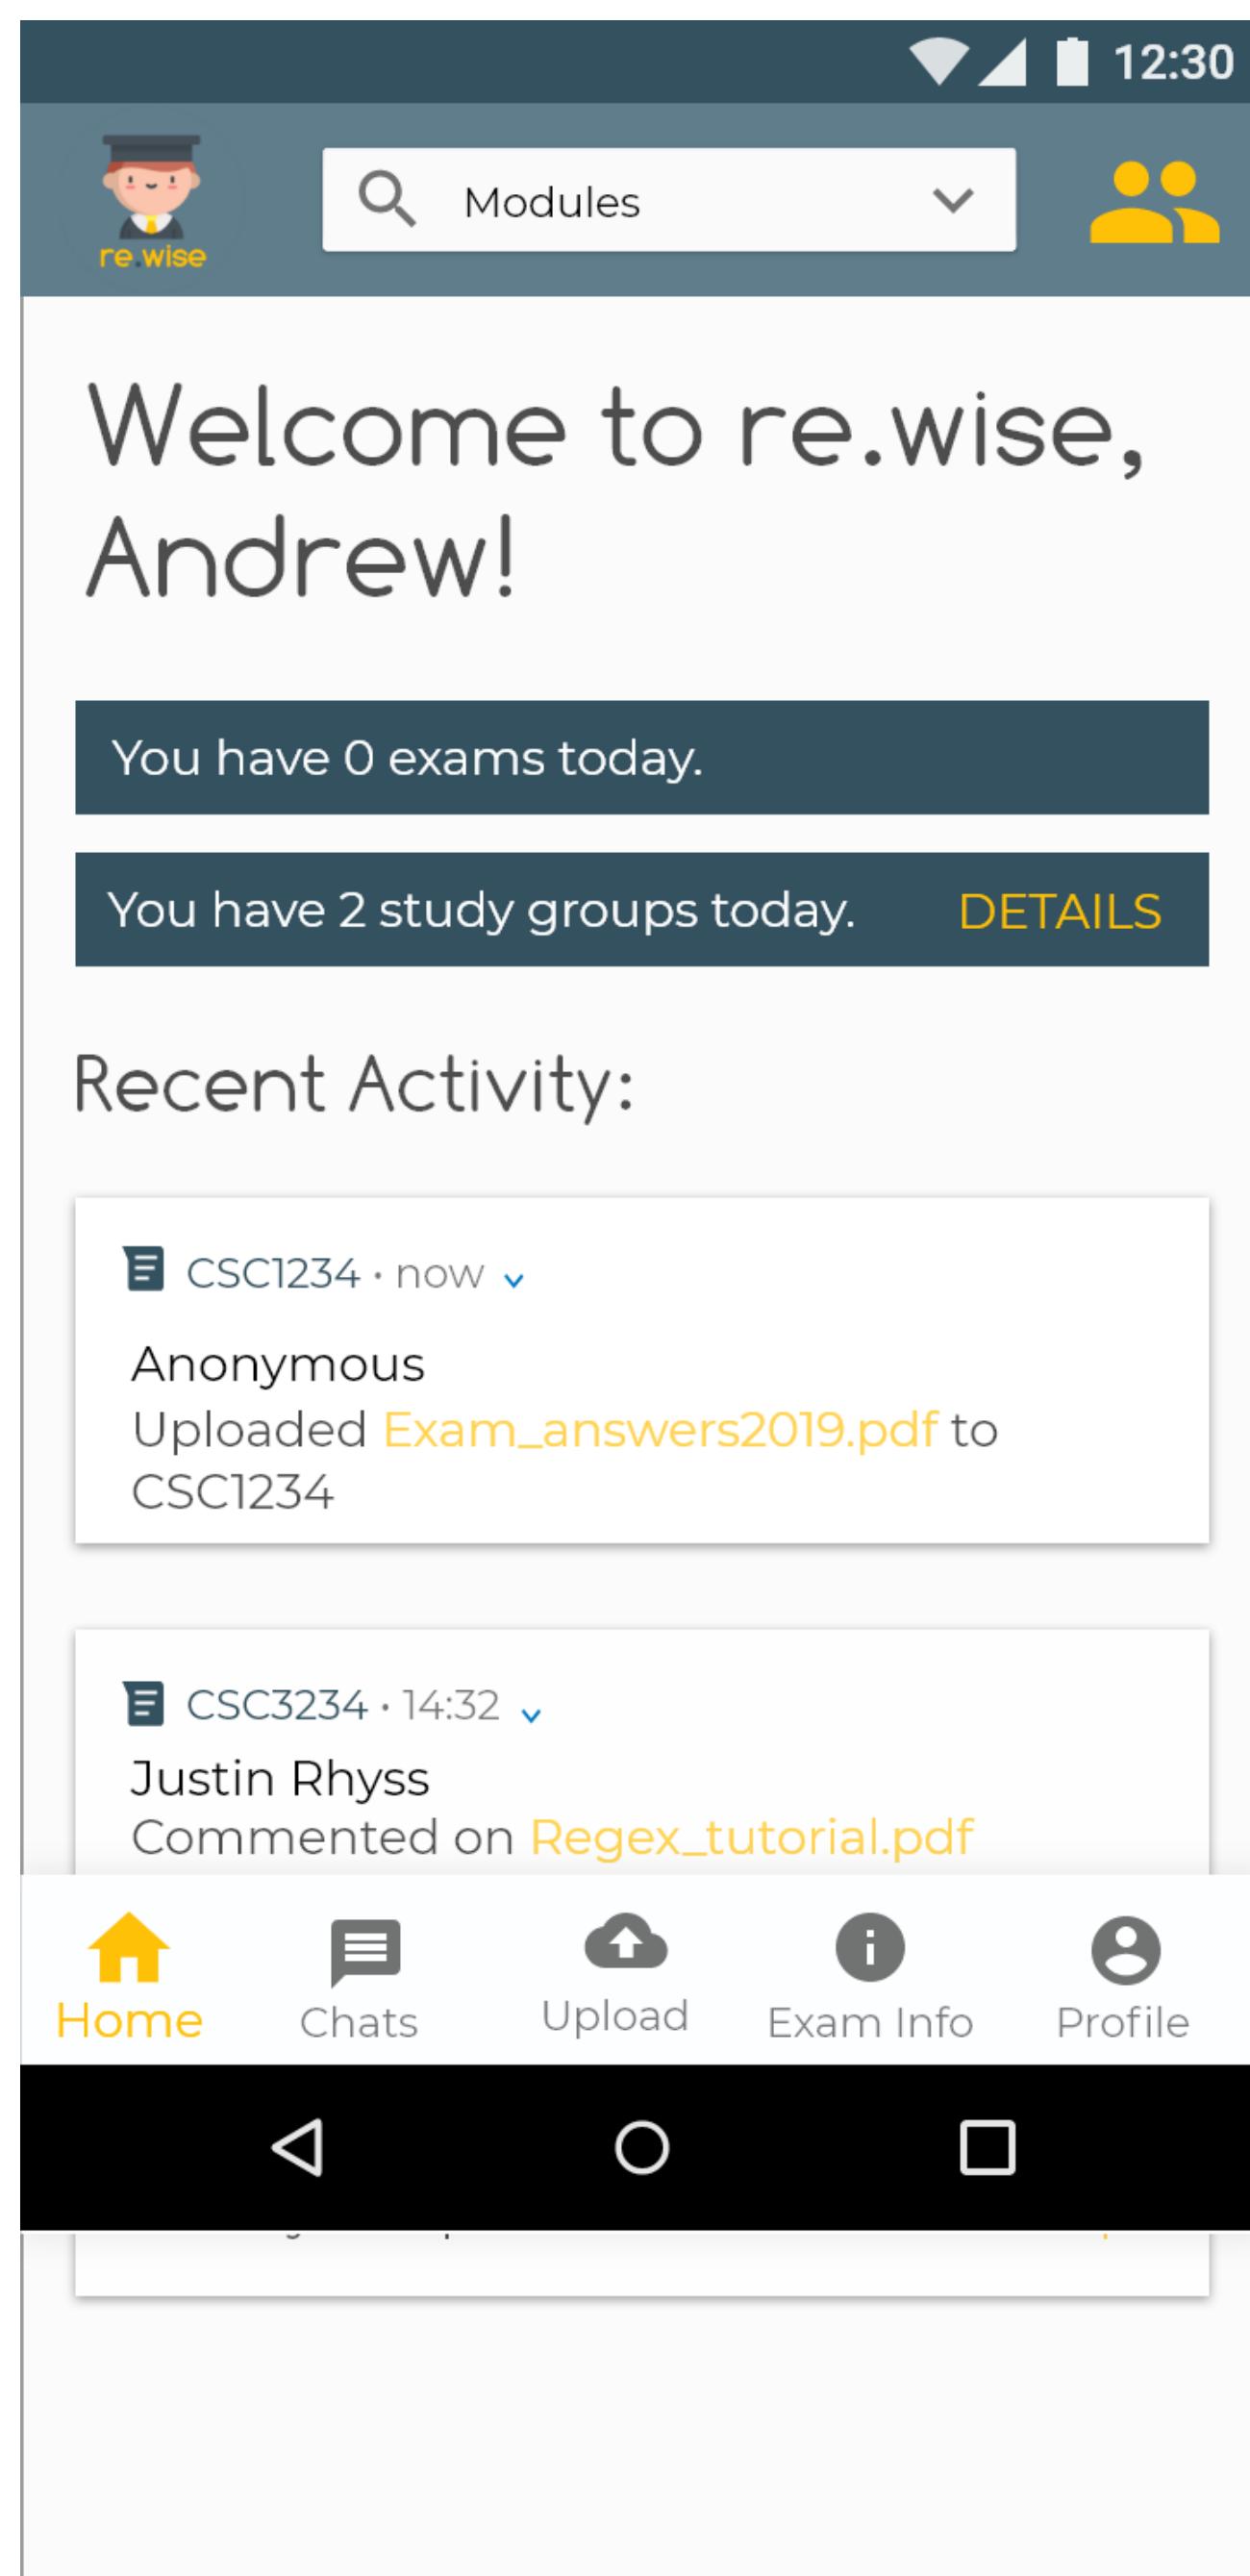

Features

- Enter your password, username and click login
- If you forgot your password, you're taken to an e-mail prompt screen and a confirmation e-mail is sent to you
- If you are not registered yet, you're taken to the registration screen and a confirmation e-mail will be sent to you when you are approved

Home Component

This component is responsible for the main control view of the app.

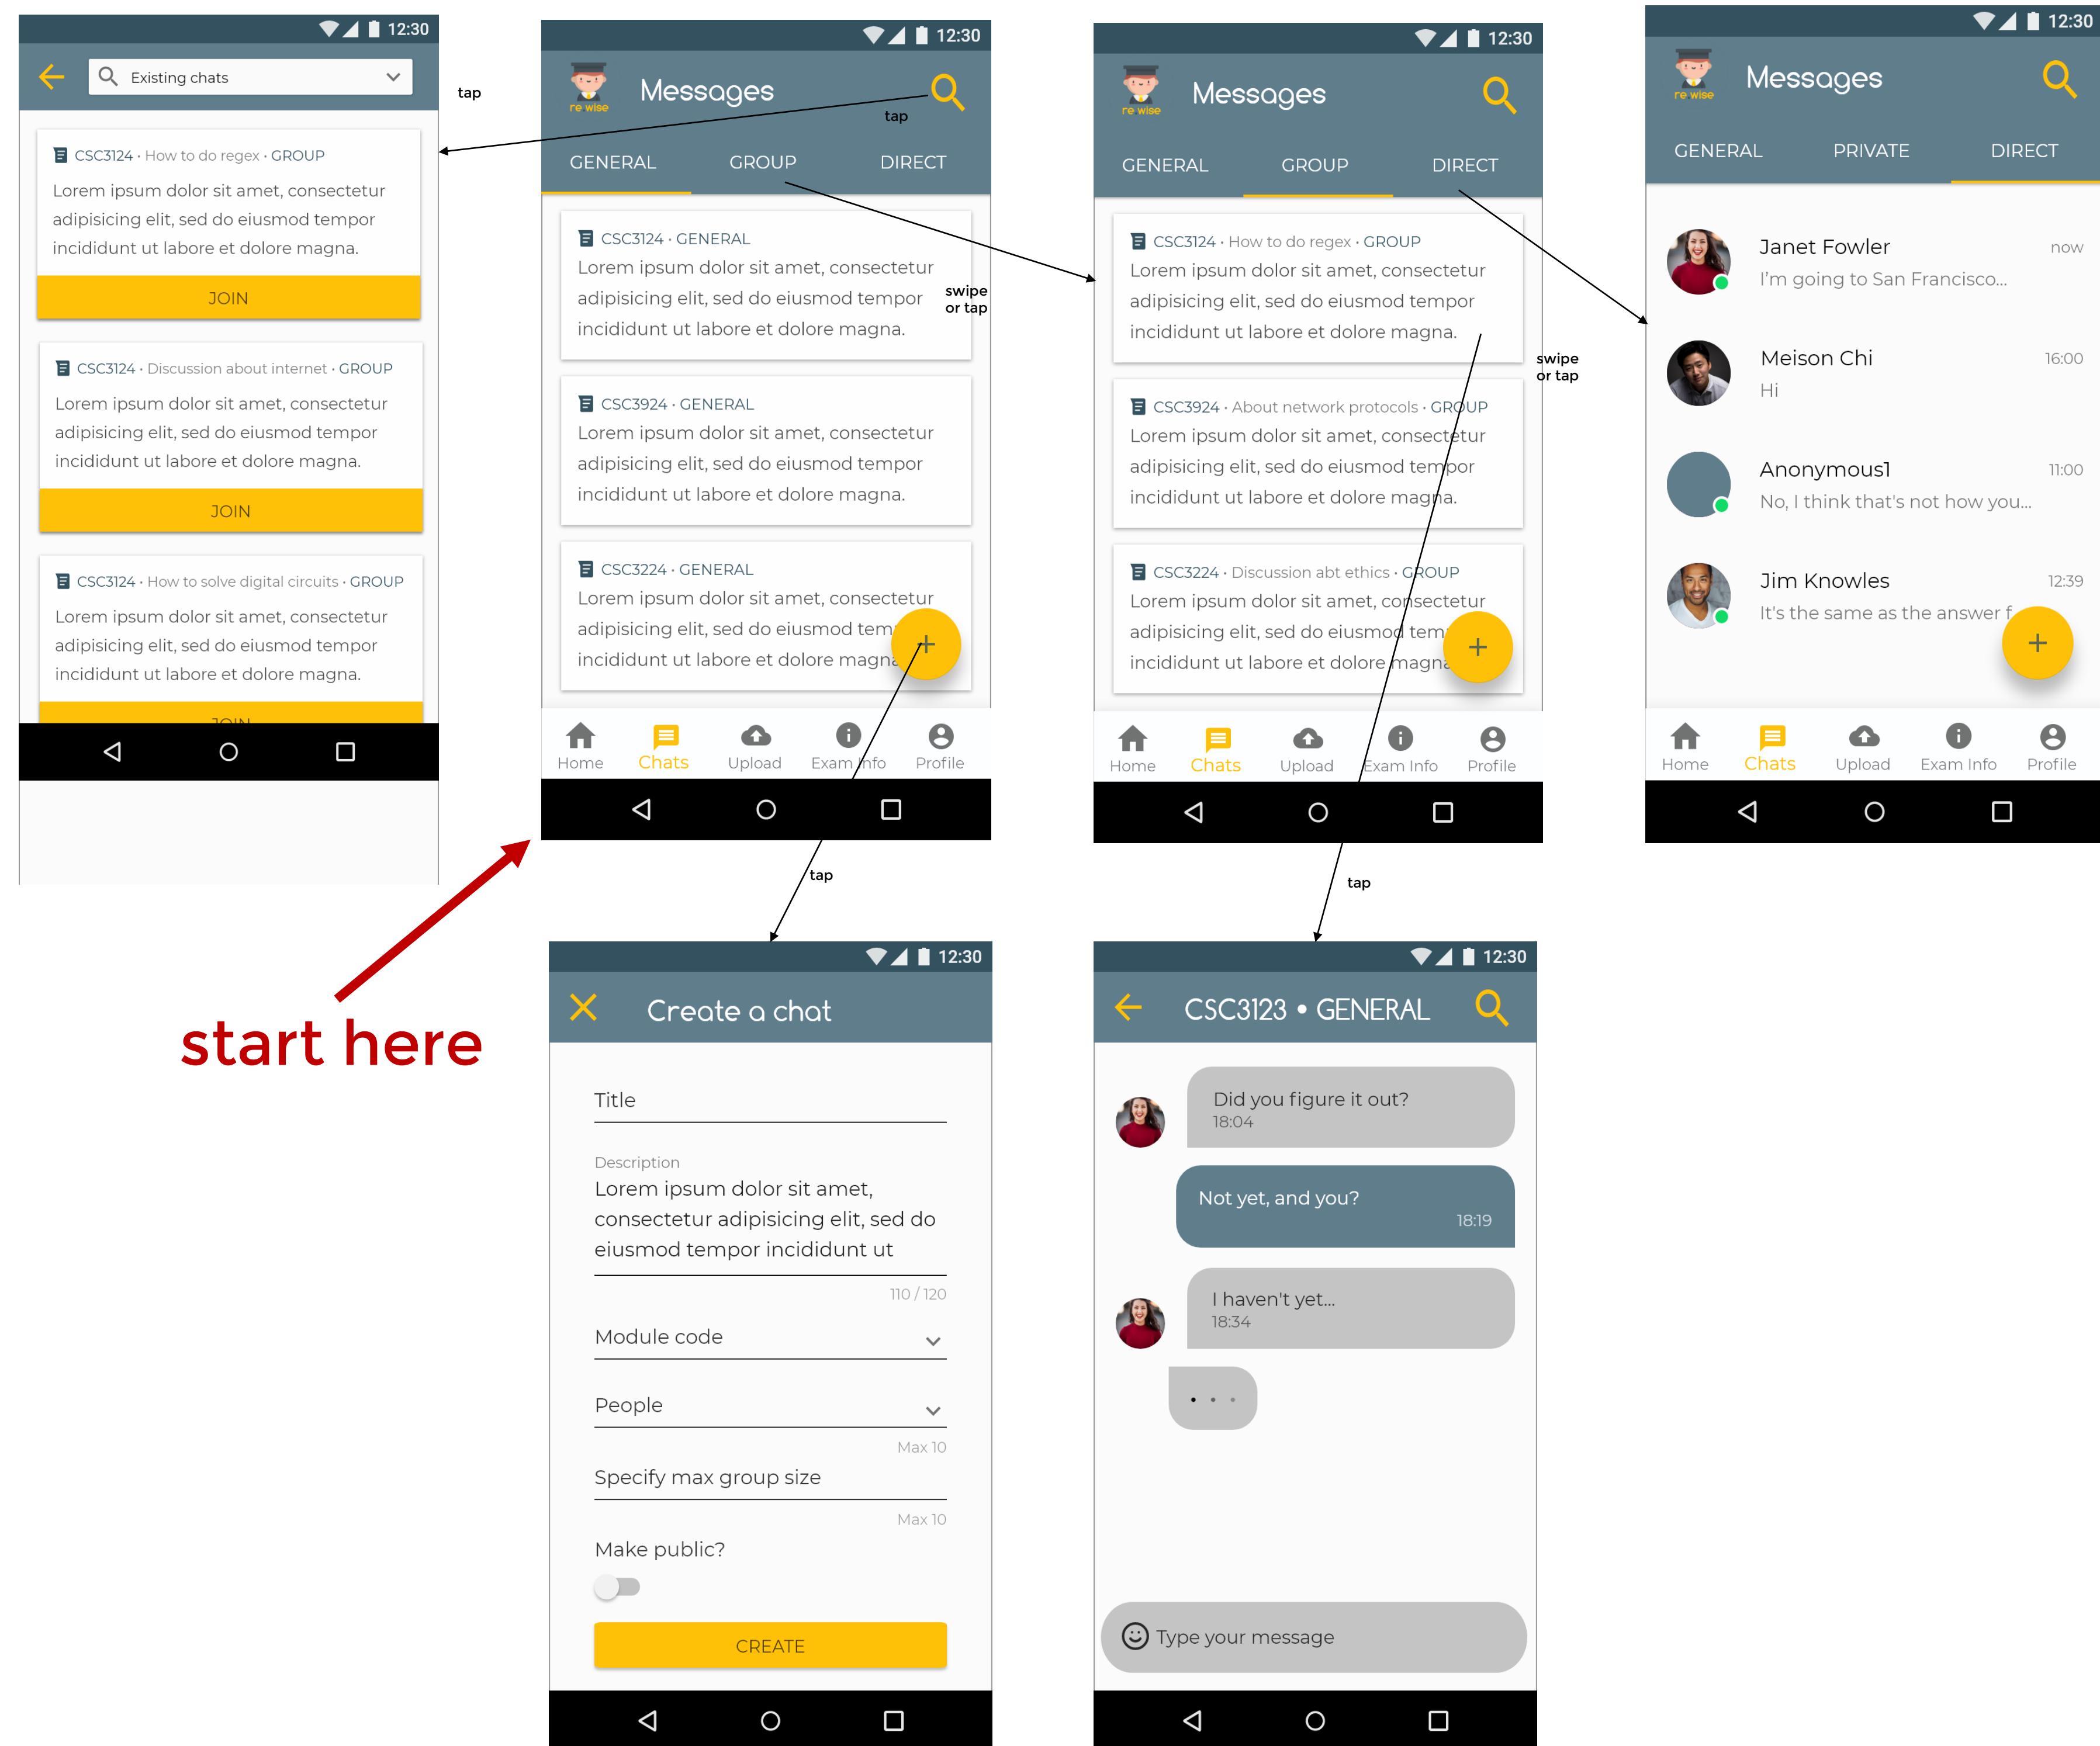

Features

- Click the re.wise logo to be taken back to the home screen
- Select a module from a list to view the module overview
- Click the study groups icon to be taken to the study groups view
- Click on “exams today” or “study groups today” toasts to be taken to relevant views
- Click on recent activity boxes to be taken to relevant views
- Click on menu bar to be taken to: home, chat, upload, exam info, profile views

Chat Component

This component is responsible for chatting and joining chat functionality.

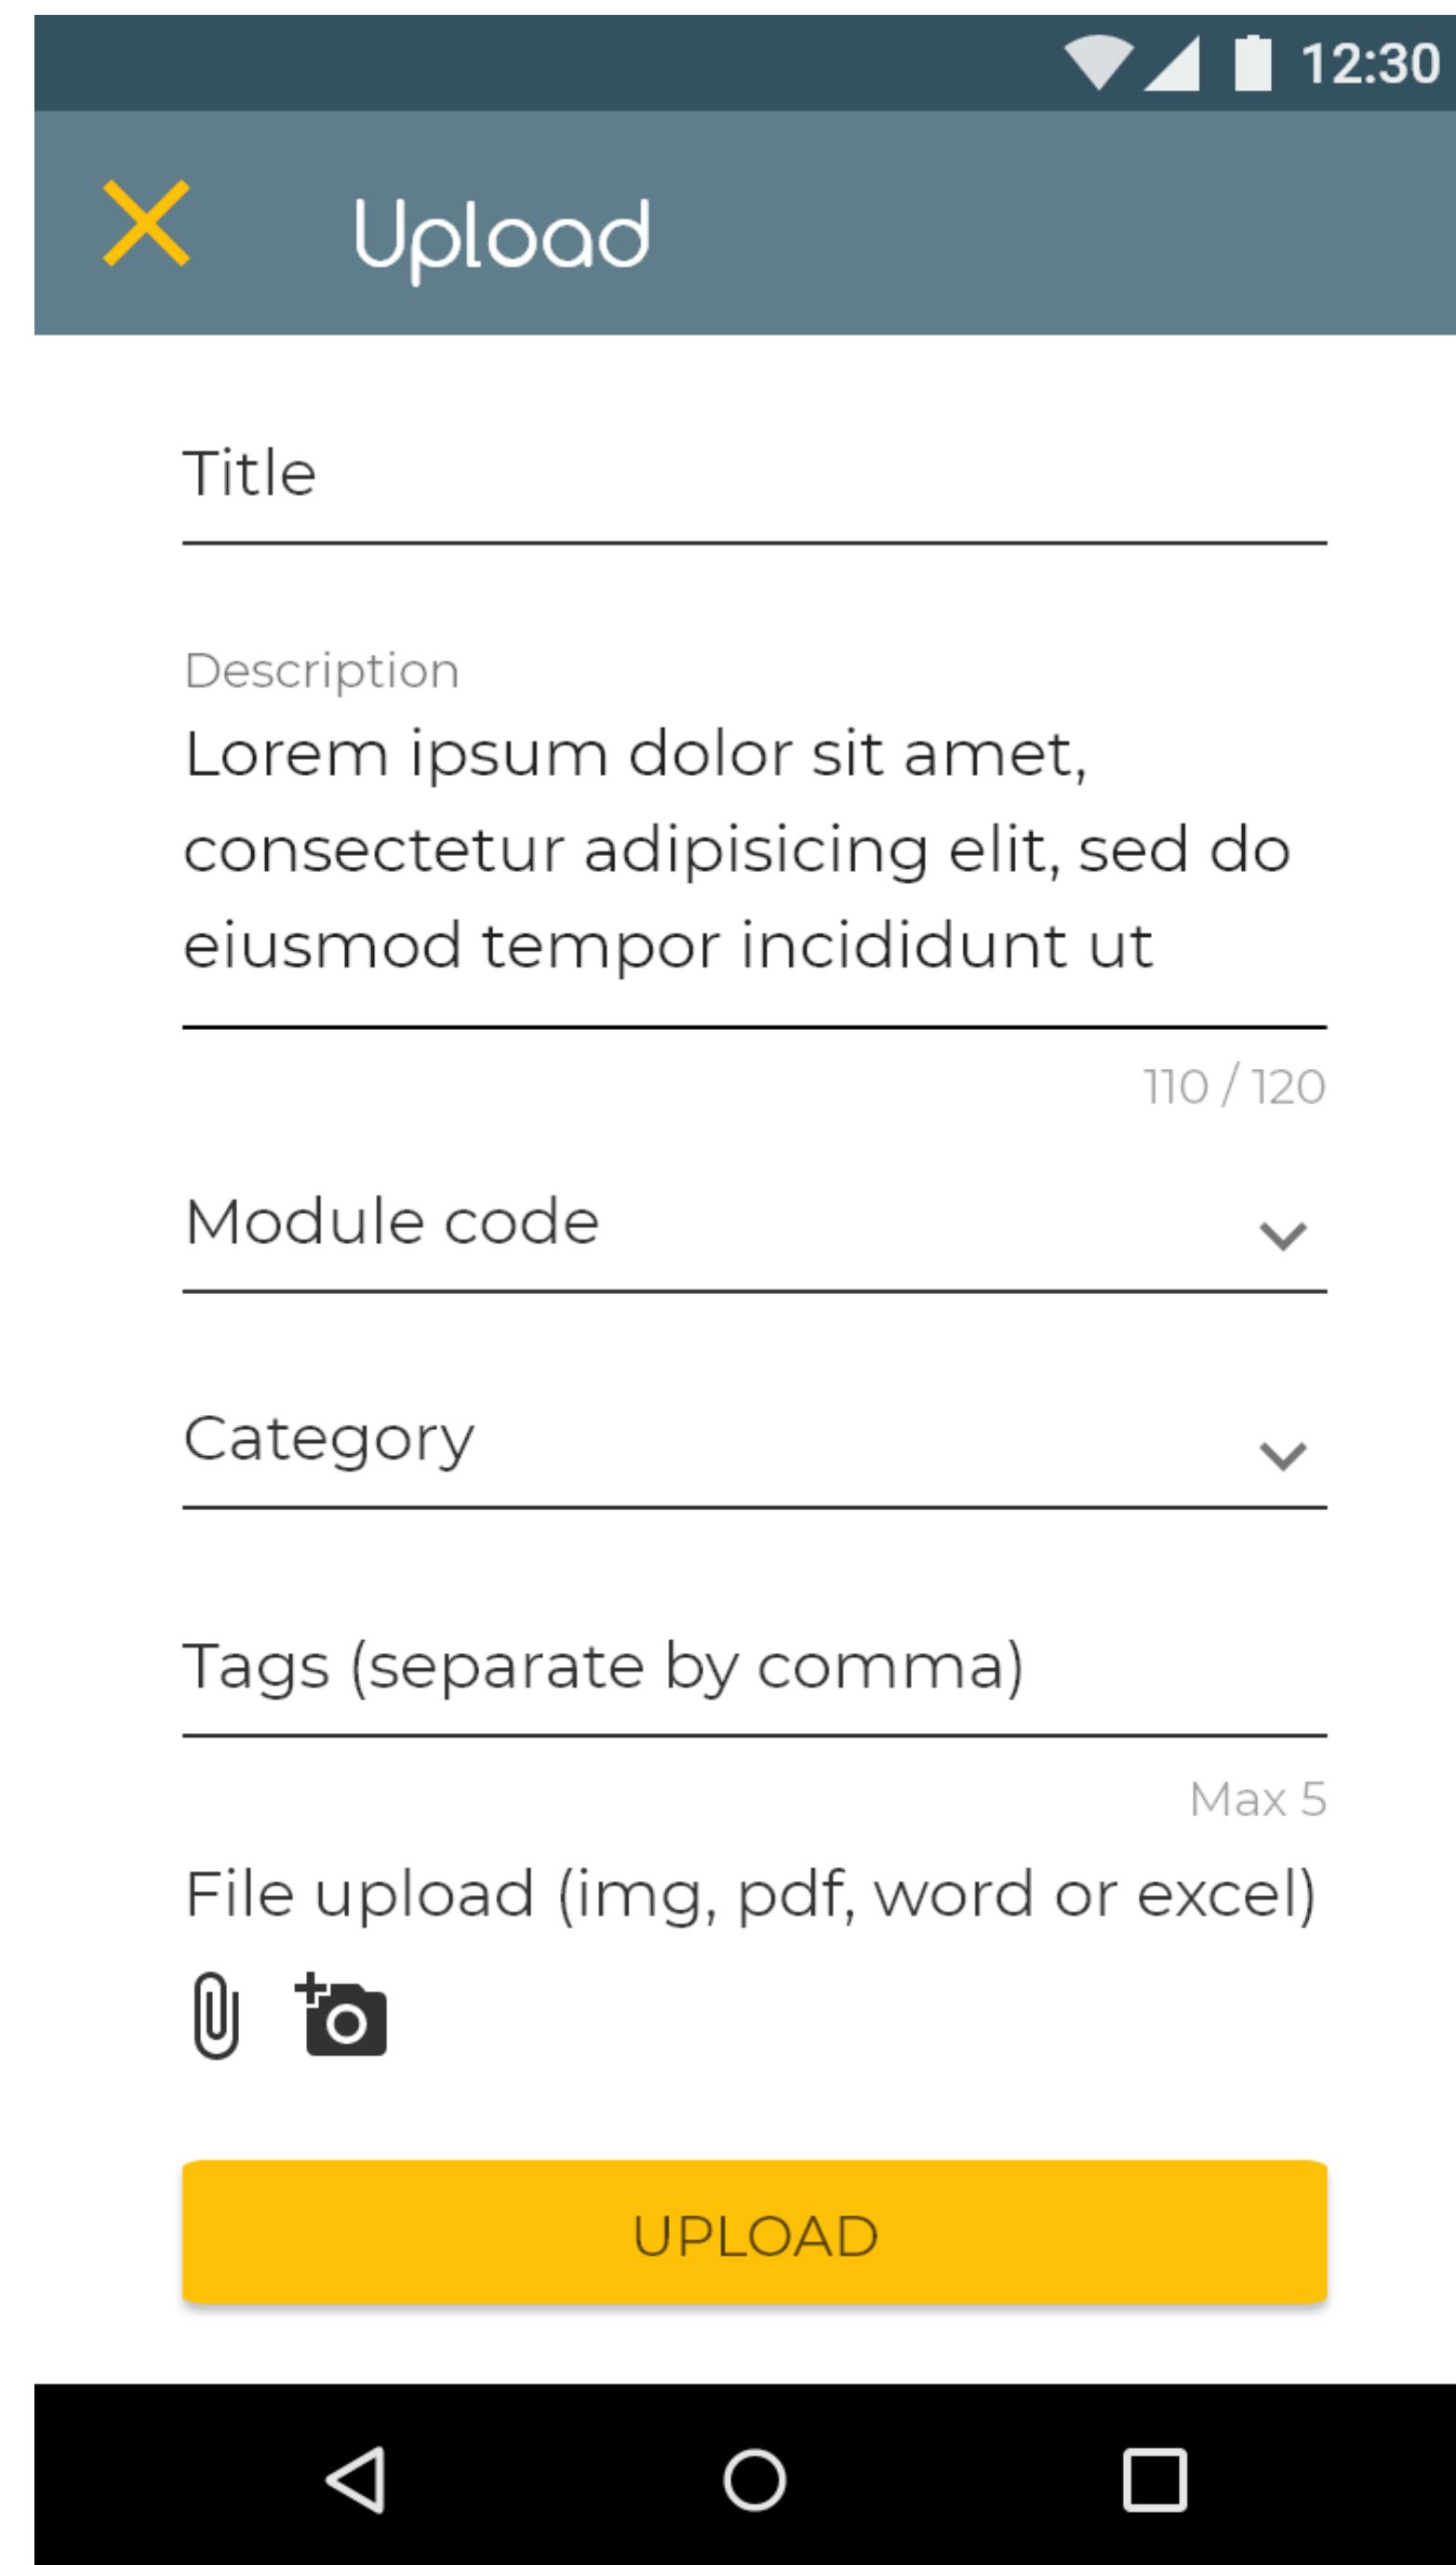

Features

- Swipe or click between general, group and direct chats
- Click on chat info overview to be taken to the chat itself and input responses
- Click the search icon to view public chats and join them
- Click on the "+" symbol to create a new chat of your own

Upload Component

This component is responsible for the uploading of files.

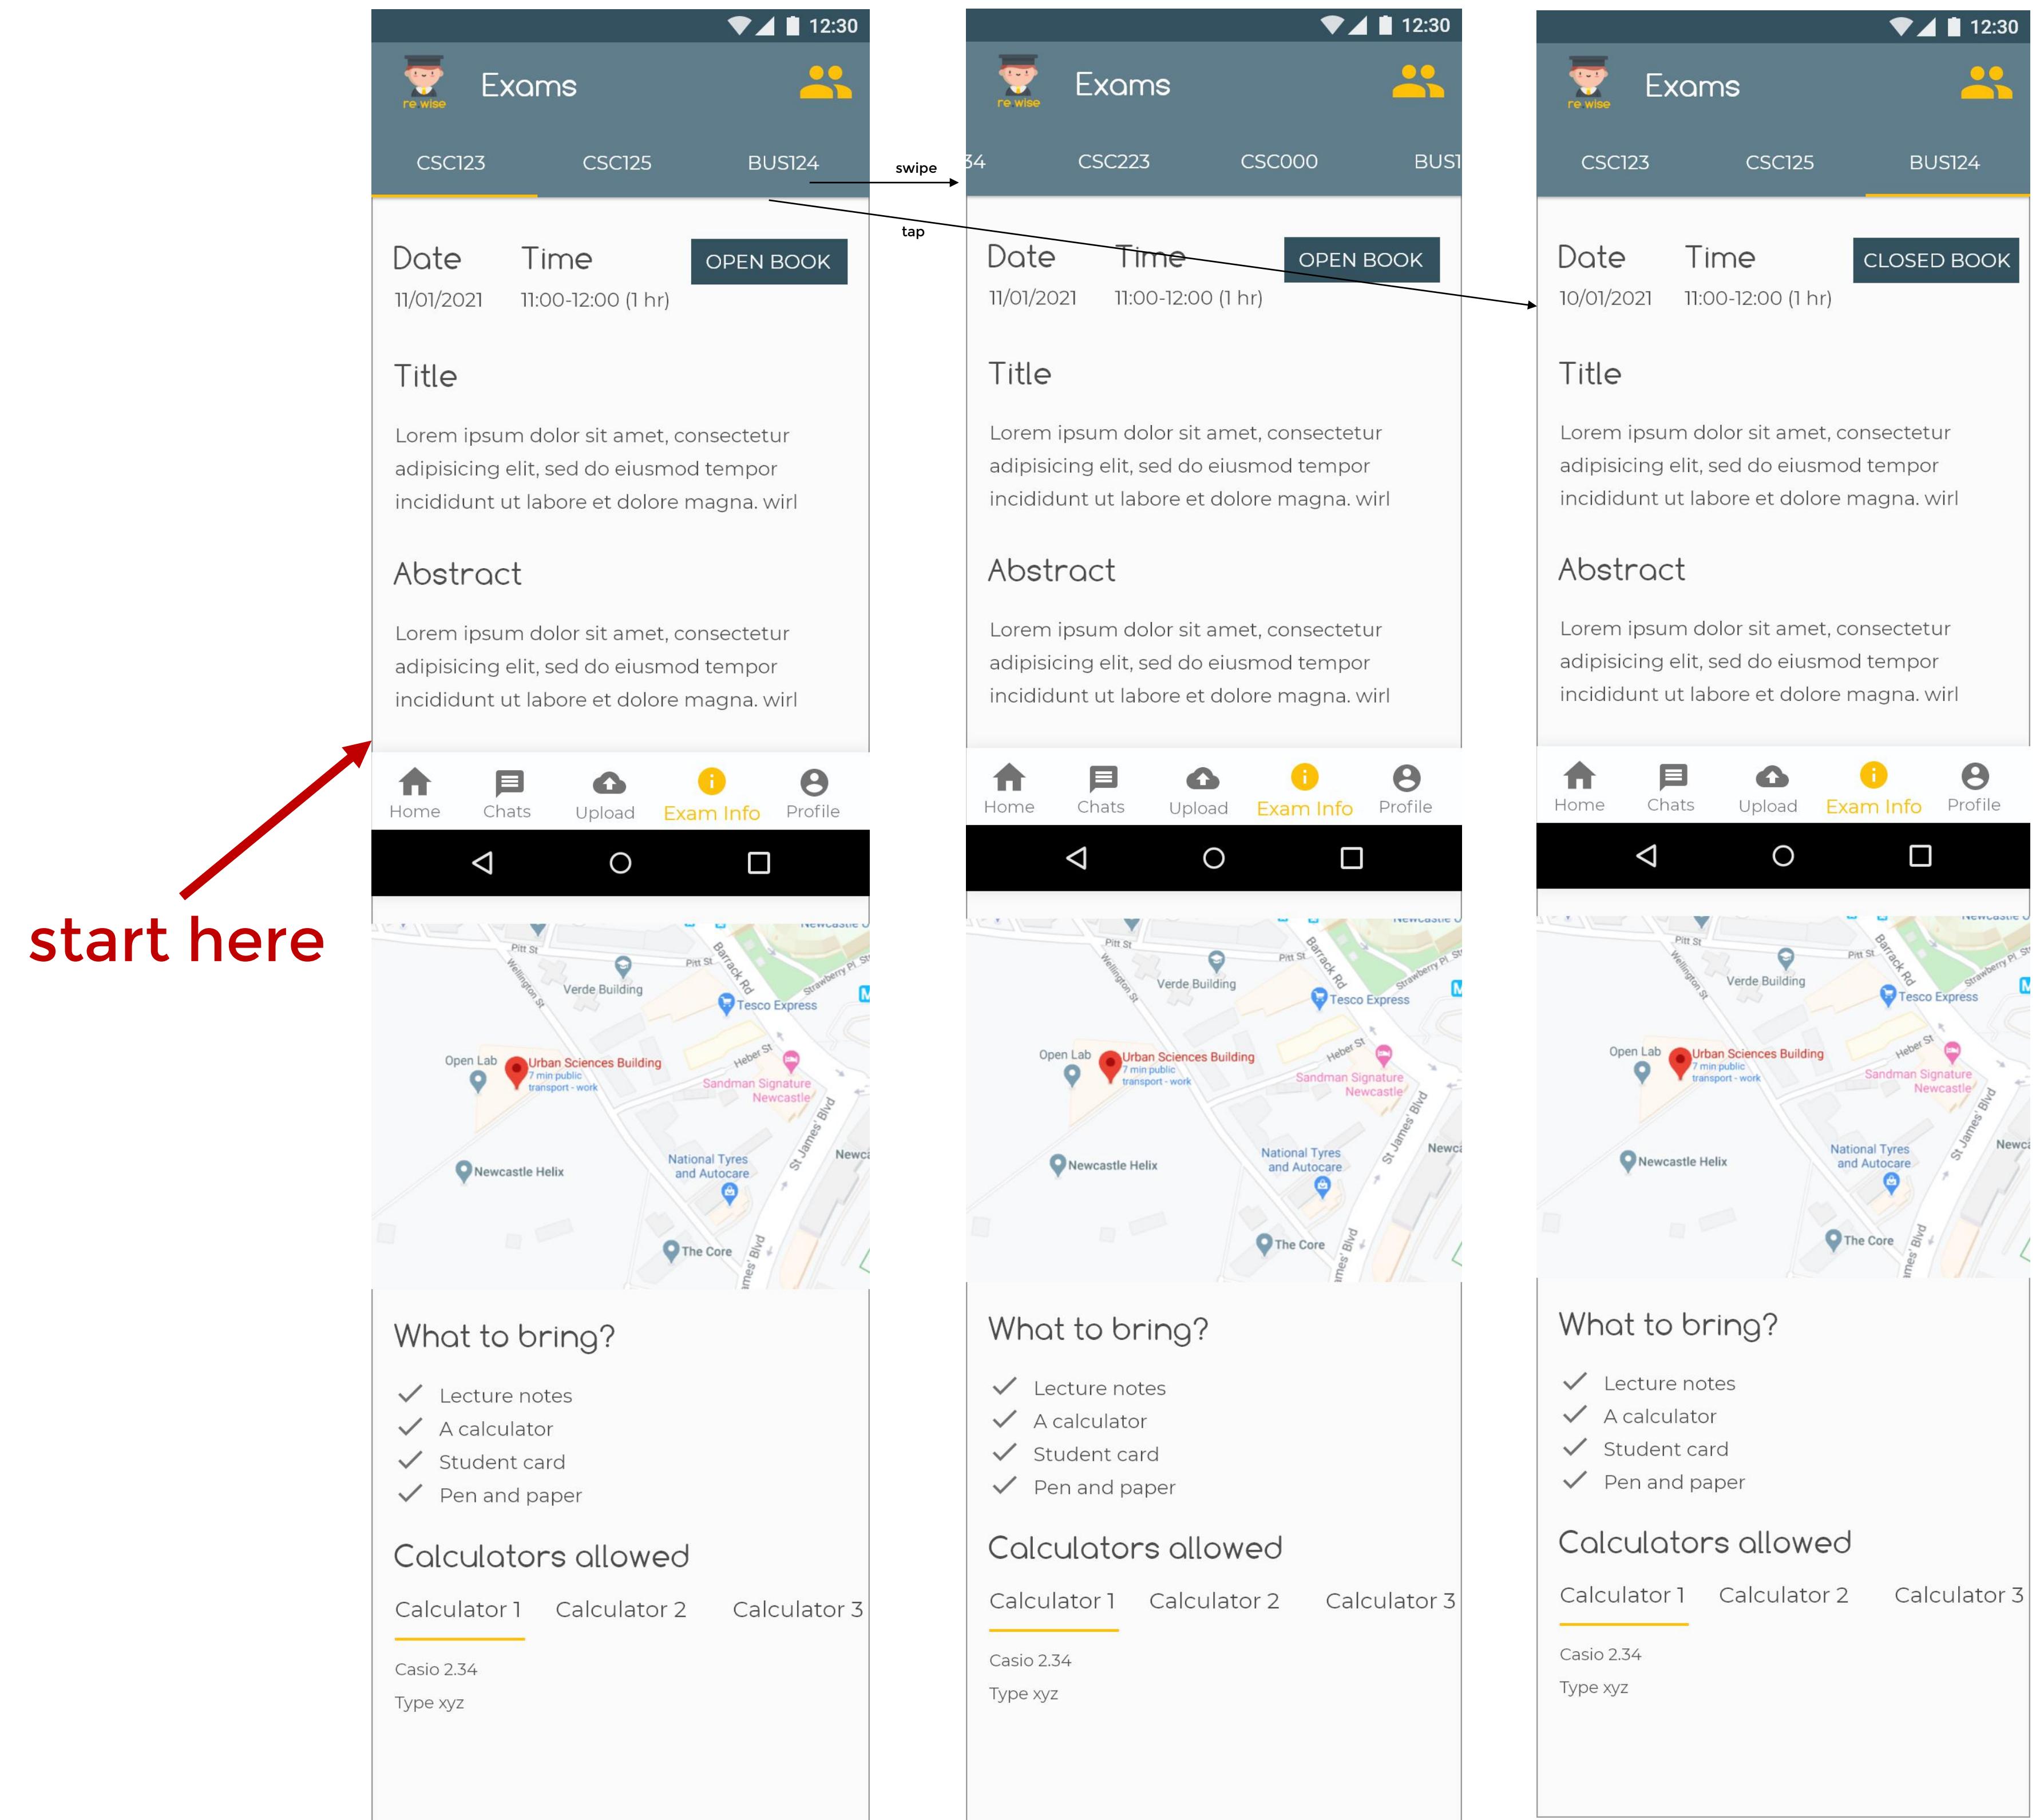

Features

- Add title, description, module code, category and relevant tags to the upload
- Upload files of any image, pdf, word or excel formats

Exam Info Component

This component is responsible for serving exam information.

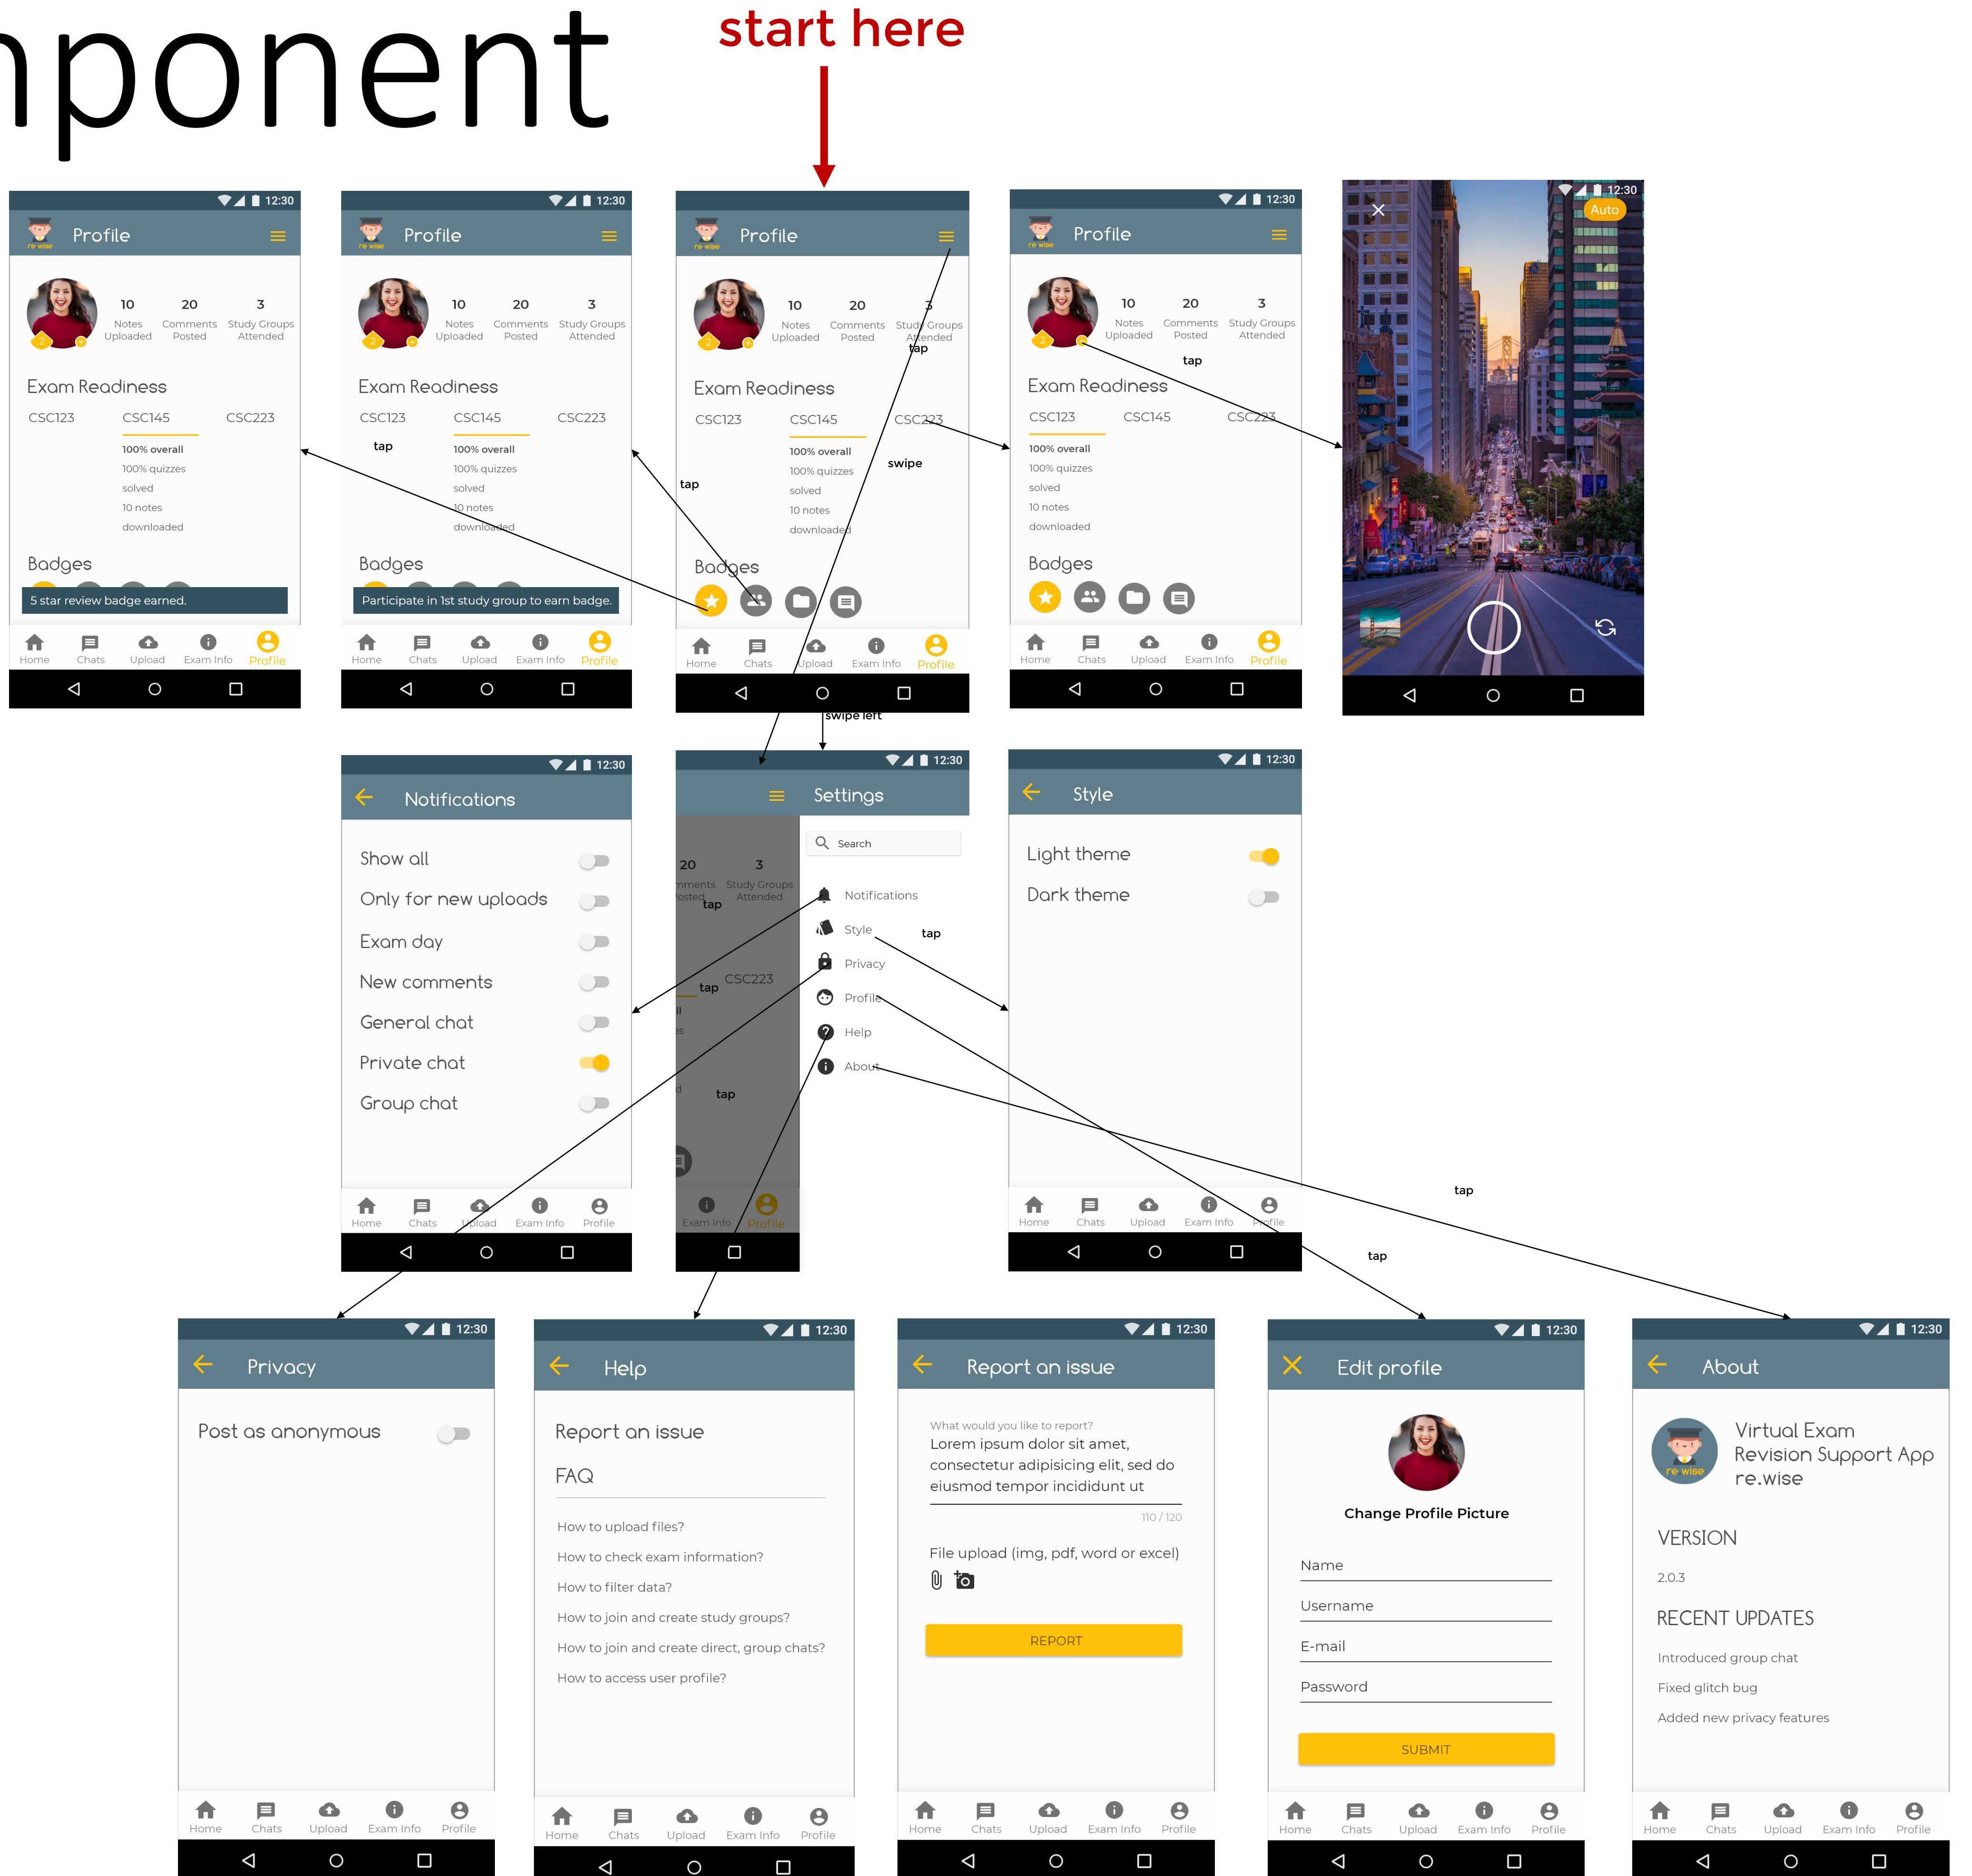

Features

- Swipe between different exams or click on them
- View date, time, method (open, or closed book), location of the exam
- View additional info, such as: what to bring and calculators allowed

Profile Component

This component is responsible for viewing, editing profile information and settings.

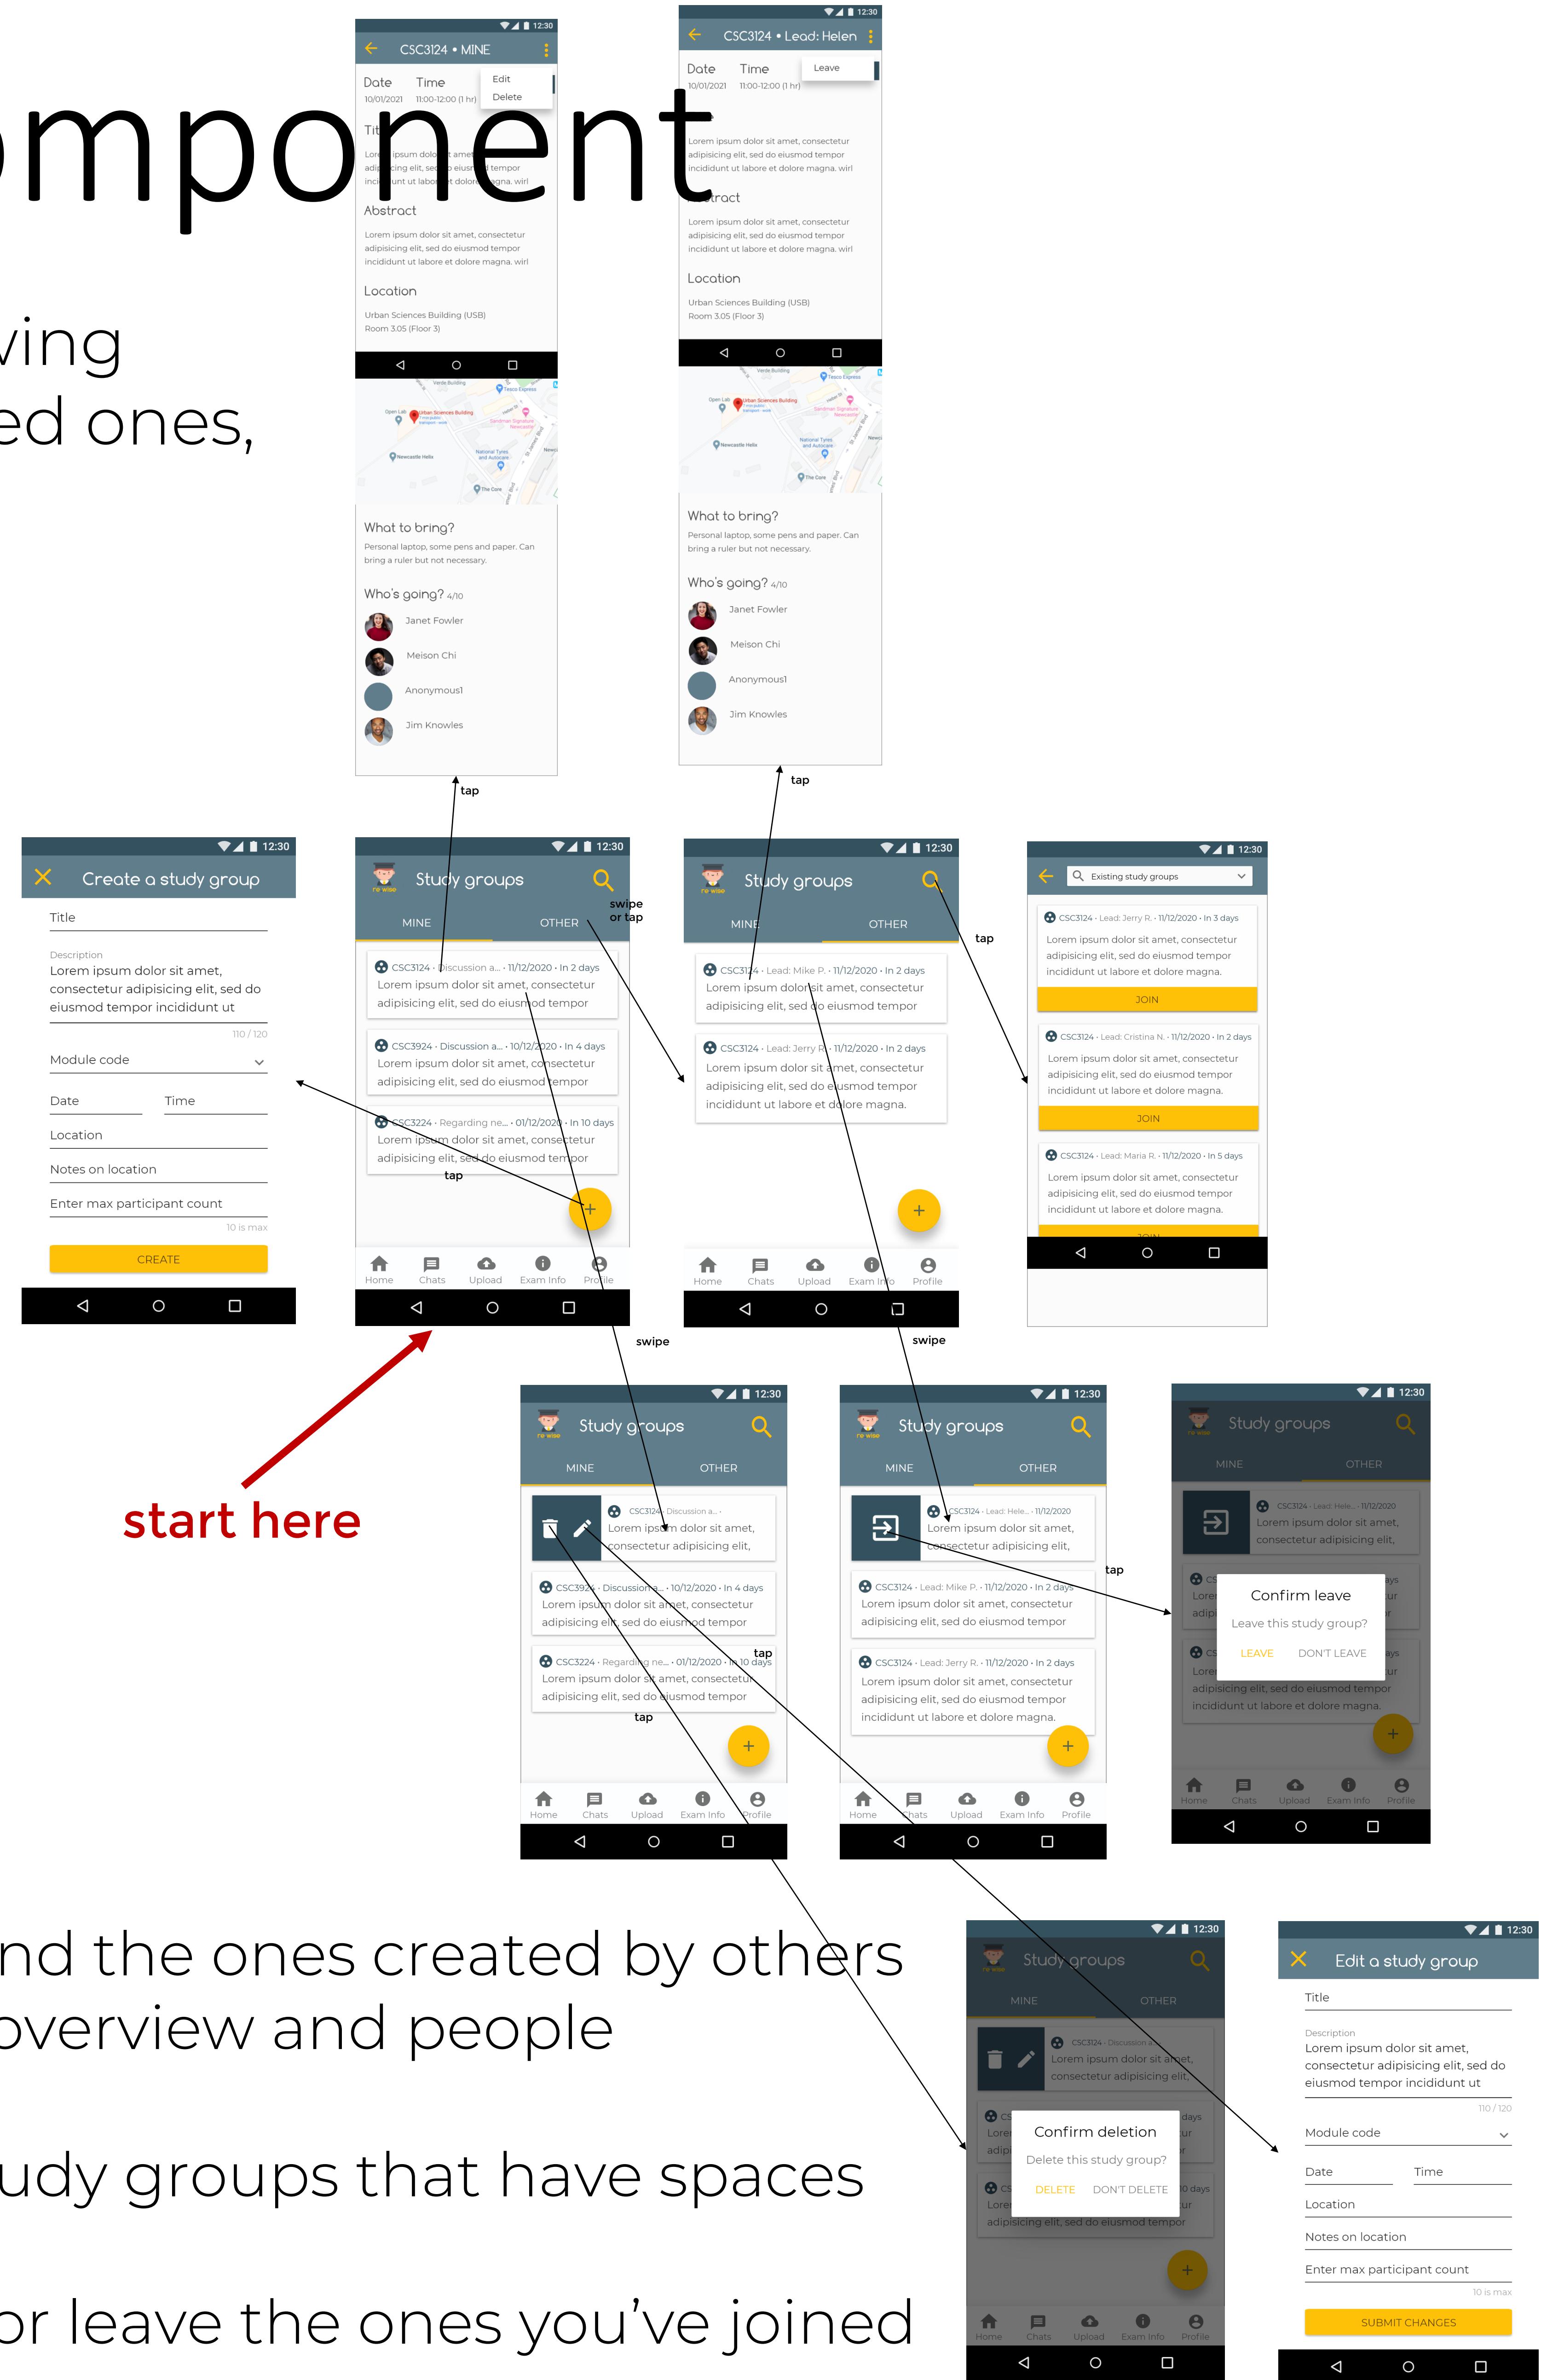

Features

- View some statistical usage info, i.e.: notes uploaded, comments made etc.
- View and edit profile picture
- View user rank based on usage info
- View various exam readiness based on usage info
- View badges earned based on milestones, i.e.: 1st file uploaded, 1st study group attended
- View settings and edit: notifications, style, privacy, profile
- View help, about information and report an issue

Study Groups Component

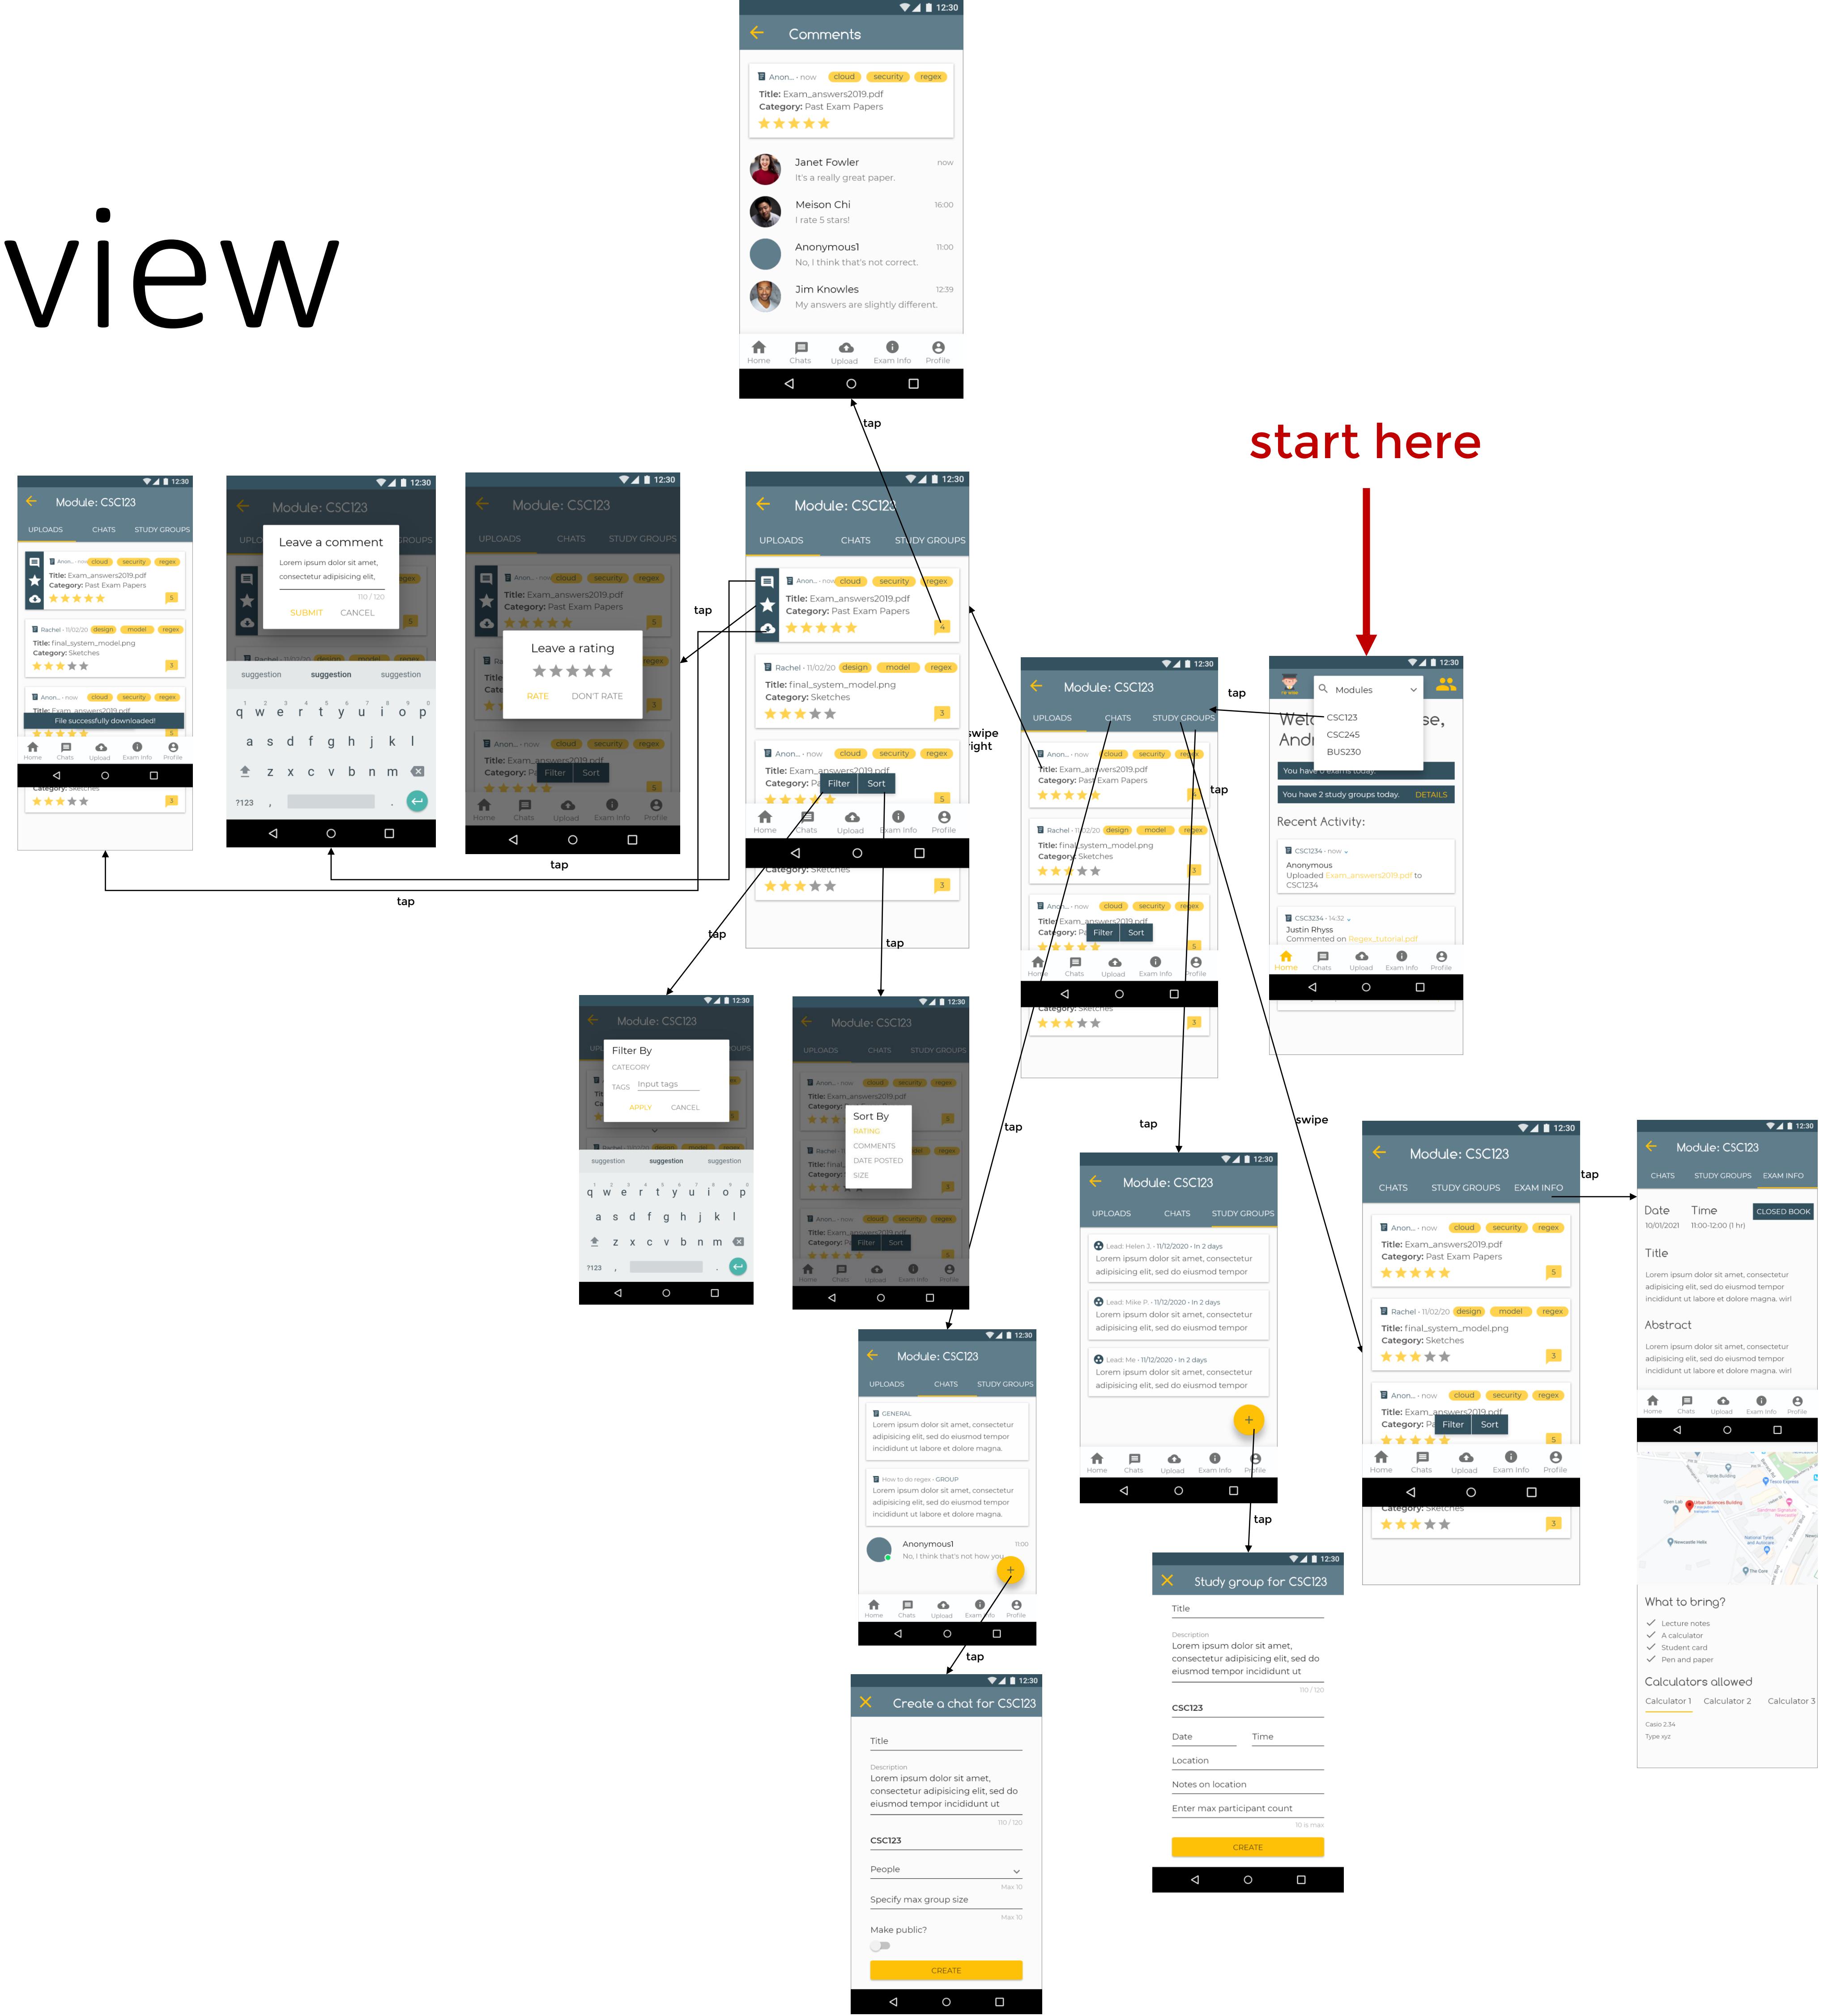

This component is responsible for viewing joined study groups and editing created ones, adding new ones.

Features

Module Overview Component

This component is responsible for showing a complete overview for a particular module.

Features

- View uploads, chats, study groups and exam info of a selected module
- Sort, filter and comment, rate, download uploads
- View tags, category, rating, comments of uploads
- Create study groups, chats for the selected module (module is pre-filled automatically when creating)

Storyboard Live Demo

View the app demo with link below:

<https://adobe.ly/2OKpXnq>

Note:

The demo renders quite slowly and only some example links exist in the app, as it would take too much time to link all of it.

When you notice that something is un-clickable, you can always click on the home icon and you'll be taken to the homepage that is fully clickable.

There is a recorded demo of me going through the app called "Virtual Exam Support App re.wise Walkthrough" that I'll be attaching to the rest of the submission.
